CIRCULAR SOLUTION FOR DISCARDED CLOTHING AND TEXTILE

OMKLÆDT

At Omklædt, we work to create circular solutions for discarded clothing and textiles in collaboration with ambitious Danish companies

Although clothing and textiles have served its original function, there is still a very large potential for recycling the textile material. That is why we offer to sew functional products from your own discarded clothing and textiles. Of course, we only recycle parts with-out stains or other obvious wear.

It is our vision that the products can replace the current purchase of textile products for your employees. For gifts, events or decorating office areas.

In that way

- your textile waste is recycled at the highest possible level in the waste hierarchy,
- you receive products with a very strong narrative, and
- you replace the purchase of textile products in your company with more sustainable products

This catalog presents a selection of the products we offer. There is also the opportunity to develop your very own unique product in collaboration with us.

All our products are produced locally in Denmark and in a socio-economic collaboration with both Frederiksberg and Copenhagen Municipality.

THE CONCEPT

You hand in your textile waste to New Retex, and Omlædt will take care of the rest

When your company is a customer of New Retex, you also have the opportunity to recycle your submitted textile waste into new functional products in collaboration with Omlædt.

Together with Omlædt, you select the parts of your submitted textile waste that you yourself want to recycle into new functional products.

To use the concept, you must submit a minimum of 750 kg of textiles.

Omlædt is then responsible for initiating a specific sorting, for production and for delivery to you. In addition, Omlædt handles all off-cuts as well as metal and plastic fractions that are sent for recycling.

In this way, you get your textile waste taken care of and at the same time you receive new functional products made from your own textile waste. The products can replace the current purchase of textile products in your company.

SAMPLES

It is of course always possible to have a sample of one of our products delivered. You can test it thoroughly and ensure that it meets your specific wishes and needs

A sample costs the unit price of the product plus a surcharge of DKK 500 ex. VAT for administration.

To order, write to
kontakt@omklaedt.dk.

Once you have received a confirmation, you can send an appropriate amount of your material to us.

It is a requirement on our part that the material you send are newly washed.

Your sample will be sent back within a week after we have received your materials.

LARGE GIFT BAG

Spacious gift bag with short handles for wrapping gifts

Subsequently practical for many different things
